SOFTWARE ENGINEERING PROJECT

Making an application to do student's registration

GROUP

Group name

- **Alpha**

Group members

- Aktaruzzaman Ridoy
- Md. Nazim Uddin Nayim
- Md. Jahidul Kabir
- Golam Jilany Rayhan
- Fabiha Tafannum

OUR PROJECT'S NAME:
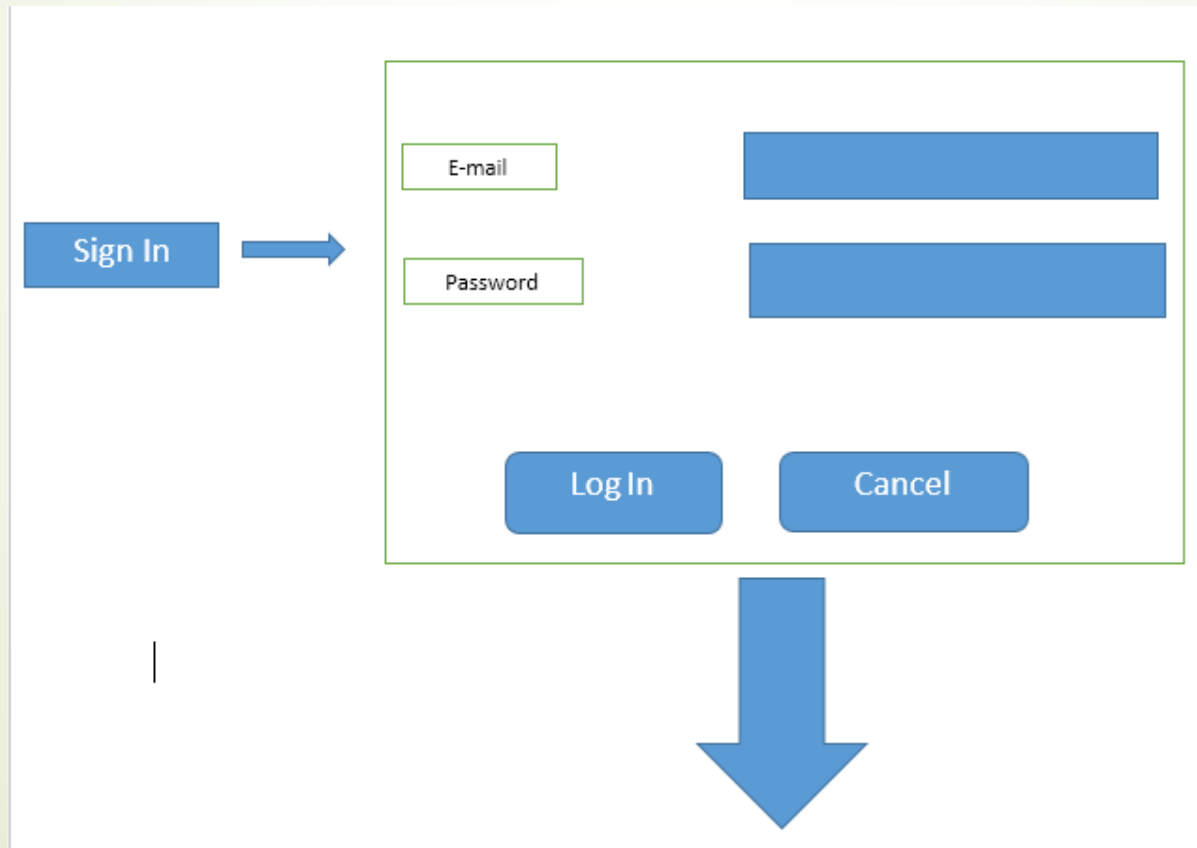

- STUDENT REGISTRATION

OUR PROJECT VISION:

- 1. Students can be one of the admins by being added to the admin group.

- 2. Admin or user both can change any of the data by logging in to the software if it's necessary to change.

- 3. All the information that will be inserted, can be saved as database so later these information can be seen in need.

STRUCTURE OF OUR PROJECT:

Student Registration System

Add student	Operation	Show student
ID	ID Search	Id:
Name	Name	Name:
Father's name	Father's name	Father's name:
City	City	City:
Blood group	Blood group	Blood group:
Phone	Phone	Phone:
Class	Class	Class:
Submit Back	Update Delete Back	

MATERIALS:

- We will use these materials for creating our software:

    1. JAVA

    2. Netbeans (IDE)

    3. ICO converter

    4. Launch4j

    5. xampp

    6. MySQL Connectors

OUR PROSPECTS:

- **Learning**

- **Developing skill of coding**

- **Improving unity power**

- **Utilizing the knowledge for future job field**

THANKS TO OUR HONORABLE TEACHER AND TEAM MEMBERS FOR SUPPORTING ALL THE TIME
